Which Contract Mentor provided feedback on this proposal? (THIS SPACE MAY NOT BE LEFT BLANK)	

Course Title and Code: Physics 125 – Quantum Mechanics

Provide a description of the Honors Contract and your study plan.

Overall Objective: *In one to two sentences, explain how you plan to achieve greater depth and rigor than the course demands and what you expect to learn or be able to do as a result of your studies. Include a copy of the course syllabus with your support materials (electronically).*

Benchmarks: *Briefly describe 2-4 benchmarks you will reach in order to succeed in your overall objective. These benchmarks should be assessable, but independent of the course requirements and should not negatively affect your course grade.*

Key: *benchmarks explain **step-by-step**, how you will learn what you need to learn in order to achieve your objective. (Your professor can help you with this! Don't be afraid to ask.)*

Assessment: *Providing you receive a B in the course and achieve greater depth and rigor by achieving the benchmarks above to your professor's satisfaction, you will receive honors credit for the course.*
